DETAILED ACTION

1. This action is responsive to the Applicant's communication filed on 1/7/2005.
2. Claims 1-8, 11, 13, 16, 17, and 20-29 have been amended.
3. Claims 1-29 are pending and are presented for examination.

EXAMINER'S AMENDMENT

4. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with attorney Wesley Ashton (Reg. No. 47.395) the undersigned for applicant on March 31, 2005.

The application has been amended as follows:

In the claims:

4. (Canceled)
26. (Canceled)

Allowable Subject Matter

5. Claims 1-3, 5-25, and 27-29 are allowed over the prior art of record.
6. The following is an examiner's statement of reasons for allowance: Applicant particularly discloses a method and computer readable medium for inserting, deleting and updating table-

format data by identifying an insertion position that indicates the position of the field value to be inserted, in said subscript conversion array, regarding said insertion position, giving an offset value that defines the range of the corresponding subscript and also identifies a stipulated position after the end of said array, in the subscript conversion array, regarding those records having a storage position number greater than the storage position number corresponding to the insertion position, giving an offset value that shifts the corresponding range of subscripts upward and also decrements the accepted subscript, and placing said field value to be inserted at the stipulated position after the end of said array, such that an offset value according to the range of subscripts within the subscript conversion array is given as the subscript and the field value with the array is identified by means of the subscript given by the offset value as embodied in the independent claims 1, 2, 3, 17, 23-25 in context with the limitations of the claims was not disclosed by, would not have been obvious over, nor would have been fairly suggested by the prior art of record.

The dependent claims, being further limiting to the independent claims, definite and enabled by the Specification are also allowed.

7. Regarding the independent claims 5,8, 11, 13, 16, 20, 22, and 27-29, the prior art taken singularly or in combination fail to teach or suggest a method or a computer readable medium wherein the data structure for table format comprises the table-format data constituted in a manner such that the table-format data is divided into one or more information blocks consisting of a value list containing a first actual array in which the field values are stored in the order of a

field value number corresponding to the field value belonging to a specified field, and a pointer array containing a second actual array in which pointer values for pointing to said field value numbers are stored in a unique record number order, a second subscript conversion array constituted such that an input. output of the pointer array is given as the subscript in the value list. and a third offset corresponding to the range of the subscript is given is formed and field value within the first actual array is identified by means of the output of the pointer array given by an offset via said second subscription conversion array.

The dependent claims, being further limiting to the independent claims, definite and enabled by the Specification are also allowed.

The closest prior art Pasquariello (U. S. Pat. No. 5,687,377) discloses a system for storing array in a programming language that allows arrays to be re-dimensioned at any time, allowing strings to be used as subscripts. However, Pasquariello taken alone or in combination fails to anticipate or render applicant's limitations above obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
